

Meriam Mhadhbi *Frontend Developer*

meriammhadhbi916@gmail.com • 99413156 • Sousse,Tunisia

Profile

As a proactive and detail-oriented software student, I have hands-on experience as a Full Stack Developer, with a specialization in frontend development. I excel at creating modern, responsive web interfaces using React and TypeScript. My skills include frontend architecture, performance optimization, and collaboration on full stack projects. In addition to my technical expertise, I highly value effective communication and teamwork.

Education

bachelor degree	10/2022 – 10/2025
horizon school of digital technologies	Sousse

Professional Experience

Full-Stack Developer,	2022 – Present
• Delivered one-on-one consulting for local and international clients • achieved top Google rankings for targeted products • Improved performance for large-scale data processing applications • Integrated complex APIs and backend systems in collaboration with cross-functional teams • Mentored junior developers and conducted code reviews to enforce quality standards	

Projects

RH Recruitment: recruitment.softylines.com	June 2023 – August 2023
• Developed a comprehensive recruitment platform enabling companies to post jobs and candidates to submit applications • Ensured code quality, architecture review, and performance optimization across React and Next.js implementation • Tools Used: Next.js, React, Material-UI, Node.js, TypeScript, Quality Assurance	
SoftyDinner: softydinner.softylines.com	August 2023 – September 2023
• Developed a digital solution designed to simplify food reservations within corporate environments, allowing employees to reserve meals in advance, reduce waiting times, and minimize food waste. • Implemented intuitive user interfaces using React and TypeScript, ensuring clean, maintainable, and high-performance code. • Tools Used: React, TypeScript, SCSS, Quality Assurance	
Softy Skills: softyskills.com	September 2023 – December 2023
• Developed a web training platform offering practical web development courses with a focus on hands-on learning and real-world application. • Built responsive interfaces and integrated content management using Next.js and Strapi. • Tools Used: Next.js, Strapi, TypeScript, SCSS, Quality Assurance	
Annodoc: annodoc.com	9 November 2023 – 12 November 2023
• Contributed to the development of a modern PDF platform enabling real-time collaboration, intuitive annotation, and seamless document sharing. • Focused on building the landing page with a clean, responsive design, optimized user experience and integration for content management. • Tools Used: TypeScript, SCSS, Next.js	
Star Business: star-business.net	December 2023 – February 2024
• Contributed to the development of a consultancy platform that simplifies business setup and management in the UAE.	

- Focused on designing and building the landing page with a modern, responsive layout and Strapi integration for content management.
- Tools Used: Next.js, Strapi, SCSS, SEO optimization
- Ostedhy:** ostedhy.com [🔗](#) June 2024-Present
 - Led full-stack development connecting educational institutions, teachers, and students through live sessions, progress tracking, and interactive tools.
 - Developed the landing page along with student and teacher websites, and the admin dashboard, ensuring a seamless and responsive user experience.
 - Tools Used :React, Next.js, TypeScript, SCSS, Strapi, Quality Assurance
- Imtiyaz Academy:** imtiyazacademy.com [🔗](#) January 2025-Present
 - Developed a digital learning platform delivering Mauritanian national curricula online with detailed lessons, interactive exercises, and regular assessments.
 - Built the landing page, student and teacher websites, and the admin dashboard, ensuring a seamless, secure, and user-friendly experience across all roles.
 - Tools Used: React, Next.js, TypeScript, SCSS, Strapi, Quality Assurance
- We Quizz:** wequizz.com [🔗](#) March 2025-Present
 - Developed an AI-powered platform for creating innovative and engaging quizzes, helping educators craft assessments that promote deep understanding.
 - Built the landing page, teacher and admin dashboards, and the student interface for attempting quizzes, integrating real-time interactions using Socket.IO [🔗](#).
 - Tools Used: React, Next.js, TypeScript, SCSS, Strapi, Socket.IO [🔗](#) , Quality Assurance

Certificates

- Legacy JavaScript Algorithms and Data Structures [🔗](#)
- Fundamentals of Cybersecurity [🔗](#)
- JavaScript Basic [🔗](#)
- Problem Solving [🔗](#)

Technologies

Languages: JavaScript, TypeScript, python, HTML5, CSS3, Sass
Frontend: React.js, Next.js, Tailwind CSS, MUI, React Native
State Management: Redux
Backend Tools: Node.js, Docker, WebSocket, Git, Github
