Professional Summary

Frontend Developer at SoftyLines with 3+ years of experience building responsive, high-performance web interfaces. Delivered 10+ projects across education, recruitment, and business software, including a collaborative document editor and Mauritania's national school platform. Experienced in Agile/Scrum teams, leveraging AI-assisted development tools to improve development efficiency and deliver clean, maintainable and high-quality code.

Professional Experience

Full-Stack Developer Intern, SoftyLines	2022 – 2023
Trained across the full stack on live client work — back end as well as front end — then specialised in frontend.	
Frontend Developer, SoftyLines	2023 – Present Sousse, Tunisia
• Built 7+ web platforms for clients in learning, recruitment, and business, helping them launch their services online. • Made one product work across computer, tablet and phone, replacing separate builds. • Made websites and dashboards faster to load, improving the user experience even on slow internet. • Turned designers' mockups into working, reusable pieces, so every product looks and behaves the same way. • Connected interfaces to live data and content systems , so users always see updated information without refreshing. • Delivered full-stack applications faster using AI-assisted development.	

Projects

SoftyDinner 📄, <i>Corporate meal-reservation system</i>	08/2023 – 09/2023
• Built the back office where HR plans the meals ahead of time, so employees can see what is coming and book early reducing lunch queues and food waste. • Built the full meal calendar, making it easy for employees to view planned meals and book them day by day.	
Ostedhy 📄, <i>Tutor-student learning platform</i>	06/2024 – Present
• Added features that let students connect with tutors, work through courses and chapters, and join live online sessions ,while giving teachers and admins the tools to manage them. • Worked across the platform's different interfaces, fixing bugs and logic issues that affected users.	

WeQuizz [↗](#), *AI-driven quiz and assessment platform*

03/2025 – 01/2026

- Built a platform where AI generates the questions, so teachers stop writing every quiz by hand.
- Delivered teacher, administrator and student screens, with results appearing live as students work.

SoftyWord [↗](#), *Real-time collaborative document editor*

04/2026 – Present

- Built an editor where several people write in the same document at once, without overwriting each other.
- Merged web editor, mobile app, service and design system into one codebase, built with AI-assisted development.
